**Professional Development Training**

**Classification, Labelling and Safety Data Sheet Requirements  
in the EU & GB**

Saturday, September 17 through Sunday, September 18, 2022  
Crystal Gateway Marriott Hotel – Arlington, Virginia

**Course Description and Objectives**

Although the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) has been implemented in both the US and in Europe, there are significant differences in each jurisdiction's regulations. In Europe, the classification and labelling parts of the GHS are implemented through the CLP Regulation, whilst the safety data sheet requirements are implemented through REACH.

This course will outline the key requirements of CLP and REACH with respect to hazard communication and highlight the differences with Hazcom 2012. It will also highlight where divergence between the EU and GB CLP and REACH regulations are beginning to occur. Practical exercises will be held throughout the course to reinforce the learning.

**Intended Audience**

It is assumed that delegates will have a working understanding of the GHS classification, labelling and safety data sheet requirements in the U.S.

**Course Fee:**    \$850 / members                      \$980 / non-members

**Course Director / Instructor**

**Gill Pagliuca**

Gill Pagliuca has worked in chemical safety for more than 30 years, providing consultancy services including classification and preparation of safety data sheets for a wide range of customers and products. Gill runs the CHCS modules on classification of substances and mixtures. She is also the current Chair of the CHCS.

**Course Instructor**

**Mark Selby**

Mark had many years' experience with a major test house before setting up his own business and runs the very successful CHCS modules on ecotoxicology, advanced SDS writing and Exposure Scenarios.
