

PFAS: The Changing Regulatory and Commercial Environment in the US and in Europe

James Eggenschwiler, Esq.
Principal Consultant
Global Trade and Chemical Regulations Services
Trinity Consultants, Inc.

Presenter biography

Mr. Eggenschwiler is an international trade and regulatory attorney with more than 30 years continuous experience advising and representing product manufacturers and distributors around the world as a Global Trade and Regulatory Compliance authority. He has provided sophisticated compliance leadership to a wide variety of companies, ranging from privately held operations to more than 70 of the Global 500 elite. Many of his engagements have involved extensive in-country experience outside the US. Jim has supported a wide variety industries including Chemical & Specialty Chemical, Pharmaceutical, Medical Equipment, Aerospace, Industrial Equipment, General Manufacturing, Transportation, and Retail.

Relevant to his presentation at SCHC, Jim has provided substantial guidance to clients concerning the manufacture, processing and use of PFAS substances in commerce, and has guided and supported clients with new PFAS substance registrations representing new alternative chemistry that distinguishes new forms from those currently in scope of EPA criticism.

Presentation abstract

Beginning with EPA's controversial cancelation of hundreds of Low Volume Exemptions, PFAS has become a preeminent regulatory topic with continually expanding consequence. This presentation is intended to shed light on the progression of EPA's regulatory posture, and offer insight into the continuing changes in hazard profile advocated by EPA, and the commercial complexity posed by PFAS definitional differences in global markets.
